1. Use a flat brush, always make it wet a little so it absorbs better, wipe off water excess @ paper towel
 2. Poor a little POWERTEX Bronze on a plastic lid or alu paper
 3. Take a pinch of colortrix Brons Gold pigment and put it next to the Bronze Powertex
 4. Dip your brush into the pigment and mix it little by little with the Powertex Bronze
 5. Steadily add more and more pigment until you obtain a nice bronze gold looking paint
 6. You can now drybrush^o with this mixture,
 7. Repeat the drybrush technique, apply 3 to 4 layers, adding more grains of bronze gold pigment to it steadily to obtain more and more color intensity & bronze effect
- ^o same technique see drybrush easy Varnish-pigment sheet

*COLOR MIX USED TO GET A NATURAL BRONZE
