

EQUINOX

International Colour Day – March 21st

An international day of colour and light has been considered as appropriate since colour is, thanks to sight, one of the most influential phenomena in people's lives and also one of the channels that contributes most greatly to the perception of reality. All around the world we will create memorable colour activities during the same colourful day!

International logo design was created by Hosanna Yau.

Why March 21st?

March 21st every year is the “equinox” — aequus (equal) and nox (night). Around the equinox, the night and day are approx. equally long, symbolically relating to the complementary nature of light and darkness, light and shadow expressed in all human cultures.
